The game is pretty nice, especially the story. It's a horror-HOG, which is a nice mix. I would rather like when the characters would talk and the speech wouldn't be written but in this game it doesn't really matter. There is not that much talking.. Good manager, simple gameplay and great support from developer! I recommend this game :). I played the original version of this game from Sierra. Back in 1994 I loved the hell out of this game. When I saw that there was a remake of it a few years back I had to buy it and it did not disappoint. I've always been a massive fan of Sierra's products, Space Quest, King's Quest, Police Quest, Quest for Glory, all of which are amazing games IMO. But when this came out it was a completely different kind of game than I was used to from the company. It definitely has more of an adult or teen vibe, so if your a fan of classic point and click games, or Sierra, or mystery, then I definitely recommend this game.

It is very entertaining and you actually get to learn new things about the history of Voodoo in New Orleans.. *Edited Review with SPOILERS at bottom*

2.5 hrs gone by quickly, got to day 29 so far on normal mode. Not sure what to do now... Also don't understand why Scouts keep dying quickly, even when choosing strong, brave, or quickfooted workers for the job (and giving steel armour). Also have Alchemists that don't do anything? Idk, guess I'll have to play a bit longer to find out. Fun so far, bit aimless once you've crafted everything that can be crafted. All you can do is wait for some more 'strong' people to become new workers but since it's rng, wait could be days. Wish there was a way I could convert some other personality types to 'strong'. Maybe like making a warriors training centre or something. Waiting isn't fun :(

Grab it while it's on sale I guess, it's an interesting game. Beautiful artwork.

SPOILERS, Edited Review

So after spending more time in the game, I found out that alchemists are indeed useful. Also I've figured out how the scouts work. Basically if I send 4 or more scouts together (use quickfooted) with steel armour, they all manage to come back alive and give the explore dungeon option. The trick with scouts is to get them prepared at night when the workers are sleeping so they all go off together in the morning. If you send one not with the group, then it'll die. If you have too many normal workers as well, send them off to explore on the ship so you can get new workers which you can set as warriors or scouts. I used 4 quickfooted and 1 strong for my warriors and 2 alchemists and easily beat the dungeon. Now I've unlocked the temple, so yay new content.. one of the best poker games ive ever played. Under the Cruel Star is the latest dlc that focuses on what Graviteam specializes on; intense, and not widely known, battles on the Eastern Front rolled into a larger operation. I have only played as the Soviets so far so my experience is from that perspective. Historically, the Soviets task is extremely hard to accomplish and in the game it is no different. I've played this series for some time and while I'm not an expert, I'm no slouch either and at this point I am almost certain I will lose.

All of the things you would expect from a Graviteam DLC are present; A fantastic map, painstakingly accurate OOB's and objectives, realism, frustration, head-scratching and plenty of play time. I am on turn 7 of a 10 turn campaign and so far I have over 90 hours of play time. And that is just from one side. Never mind the Quick Battles and Editor featuring this new map, So for me this is another great value.

I personally really enjoy UtCS, and while the equipment might be the same as in other DLC's, the Operation has it's own uniqueness to it that for me it is very fresh. I struggle with finding the right way to approach things so all is not lost.

Would I recommend this as a noobs first DLC? No. There are others that add many more unique units for players to expand their in game equipment. Is this a great addition to an ever expanding series? Absolutely. And as another player has stated, I'm having a lot of fun losing.. Paintball is really fun!. Nice story, but a bit small.

what a game!!!!!! finally a rugby league manager game that give you the option of running your team and getting them as far as possible in the cup or to win promotion or the superleague/nrl finals.

just a few things that i feel need to be changed -

- 1) when offered a dream job - make it easier to go straight to the offers from the message notification
- 2) rfl criteria - when you provide a warning, please give us a hit as to how far over we are so we can rectify the issue - for example i had too many players earning over 43k but didnt tell me by how many so had to put everyone on a pay cut which effected team morral.

other than these issues its a great game. Pretty cute game, love it!. Want to watch the movie but it won't launch when I click "watch" on steam. I've seen the movie and know it's great but my wife hasn't and I figured we could watch it. Please fix your stream steam!

EDIT: Jenkmeister pointed out that if you're using Steam Beta Client the movie won't work. I opted out of Beta Client and IT WORKS NOW! Thanks again buddy!. Fun, but what is the song? I shazaamed it but it wouldn't identify it.. This is only good for the MP. The MP is basically Battlefield-lite. And no one plays it any more.

If there was a thumbs-middle, this game would get it.. HexLab is similar to chess or checkers in the Sci-Fi setting, where the difference in the heights of the playing field is used.

An unusual project with its deep atmosphere. The game has some kind of its own attractive magic. Music and graphics are chosen perfectly, ideally emphasizing unhurried meditative gameplay.

Game mechanics is unusual, I have not yet met such games. I like that the developer is trying to come up with something new, unique and original.

The game is difficult, requiring thinking over each turn. On the playing field are hexes of the opponent and the player, which he buys before the match.

To destroy the hex of the enemy, you need to cover it with your hex. Hexes can be put in a stack. Do you cane in one turn place them over a long distance. You can jump over your hexes, etc. All these game mechanics allow you to perform various tactical maneuvers.

In HexLab there are several different types of hexes that open as the game progresses. Some have blocking properties (block enemy hexes), others jump further than others, and so on.

In the game world, the gameplay is controlled by drones that fly around the playing field. Each drone has a unique ability that can be used once per match. Different drones can be bought before the match.

I advise you to carefully review the tutorial in order to quickly learn all the game mechanics and come up with your tactics. In the game there is multiplayer, where you can compete with other players.

Despite the early access, the game runs without bugs or other flaws. The only downside is that not much maps are available in multiplayer. I think that the developer will add new ones.

In general, an excellent relaxing logic game for a small price with good graphics and unusual gameplay. HexLab is constantly updated, it is clear that the developer is working on it non-stop. The game has a potential!

It is very interesting to see how game will evolve.. Splice is a very beautiful and and relaxing puzzler that can be really challenging at times. But when the mechanics really start to shine the game ends, so the puzzles could have easily been more and more challenging.. Very simple puzzles, mostly a walking sim with a somewhat nonsensical narrative.. Cliffstone Manor is charming, atmospheric, and full of surprises. The puzzles require attention to detail and some outside the box thinking. It's a clever way to explore the virtual space with more than a few hours of gametime.. This game is so much fun it's worth the money
